## WORKERS COMPENSATION

**THE SYMPTOM:** *My work comp losses are out of control. There are a variety of PPOs out there, but I can't figure out which one is best for my organization. I need a plan that is tailored to my specific needs.*

**THE PRESCRIPTION:** *Logicomp Business Solutions is the most effective way to manage workers compensation losses. We create networks that are unique to our employers. This has the effect of increasing PPO hits, securing deeper provider discounts and reducing the severity of your claims – thereby increasing your efficiency and saving your organization money.*

### **Benefits to YOU – the Employer:**

**EXCLUSIVITY** – We work with the employer to build a tailored network. As a result, most of our providers have been referred into our network. *Our network may be smaller than others, but our providers are chosen based on outcomes as perceived by other employers.*

**RELATIONSHIPS** – We maintain a close relationship with both the providers as well as our employers. *We help to solve problems by maintaining clear lines of communication between the parties.*

**CONTROL** – We negotiate significant discounts from our providers to help you manage the severity of your claims. *You will love the savings.*

**CLARITY** – Our Explanation of Benefits (EOB) reporting is clear, concise and accurate. You should never have to wonder whether or not your reimbursement is correct. *Providers love our reports and so will you.*

**SPEED** – We don't waste any time with your bill. Once your bill reaches our office, it is processed and forwarded for payment usually within 48 hours. *Claims are processed quickly.*

**REPORTING** – We provide monthly detailed reports demonstrating our activity on your behalf, incorporating all patient visits and dollar amounts. *You deserve our accountability.*

We have a base of over 25,000 providers and 1.3 million covered lives. Our clients expect excellent, efficient workers compensation services at a reasonable price and that is precisely what we offer.
